RE: Entry into the United States by Indigenous People

In light of President Trump's Executive Order to deny entry into the United States from seven (7) countries in the Middle East, even though some of these people are in possession of green cards or hold dual citizenship, I called on the Assembly of First Nations in Ottawa to inquire how this Order may affect us. I was advised and assured that the status quo remains. However, that is not to say that things could change. AFN is in direct contact with Homeland Securities in the United States.

Please call should you have any questions.
